

FALL PRESCHOOL PROGRAMS

Mountain View Library offers small group experiences for specific age groups. These programs are designed for developmental stages and learning milestones. Each one strengthens language acquisition, visual and listening skills, small and large muscle coordination, group participation and self-esteem. Parents and caregivers will learn simple techniques to use at home to reinforce what the child learns in class. These programs will help your child become ready to read.

Each week in the 7-week series in part of a sequence. The program is most effective if your child can attend all 7 classes. We also offer a Saturday drop-in if that is more convenient. Parents and caregivers also participate in the program. Please make other arrangements for siblings. Only children registered can participate.

One class per child please!
